Summary of Information

1. The intention of the target is to visit a country in south-central Europe e.g. GREECE or ITALY. His destination is within an area where large, gray rock monoliths are characteristic. Two of these monoliths form a natural "gateway" into the town/village which is of primary concern. The area is rugged with high steep cliffs or ridges. The terrain is indicative of piedmont; the type of terrain between the foothills and the mountains per se. Phonetically, names are ANDRONOPOLIS, ARKEN..., TASCONA, ANDRIKOS, MAH'MOOD and ALEXANDR.

There is a three story brick/stone building, ^{OK} ~~probably~~ a bookstore, within the town which is important to this activity (see diagram i). It specializes in old, leather books; very specific books. It has two bluish colored benches in front of it. It's appearance is central-northern European but it is not located there. It has a large red "R" and "T" on the front as well as a yellow circle with tear-drop shaped projections radiating out in all directions (reminiscent of a stylized sunburst). It has odd block letters on the window; they are not English characters but some come close in appearance. The bookstore is used to exchange small items e.g. papers and flat objects, between individuals. A yellow and green pamphlet is important to this location.

There are two other distinguishing structures within this vicinity: a circular stone tower and a water wheel (reminiscent of those found with a grist mill).

2. Additional concepts and perceptions include: the back seat of an open car with black, leather interior; a consolidation of activities; a culmination of efforts; all key people are in play/position; a canvas cart reminiscent of a laundry or postal cart; an elaborate metal object with a triangular base; "the cutting off the head of a group/organization"; a small, isolated and non-descript room with a single lamp; and "ready to act".

The intended goal will be altered; e.g. the target's plan will shift from an indirect to a direct involvement. Also the concept that there will be a shift from "the construction/assembly of a small device/object to that of direct, personal involvement.

There are two objects: 1) a bundle of rods, attached together and connected to a circular plate, slowly rotates counterclockwise while simultaneously moving forward and 2) a green box approximately 8"x8"x18-20" into which a tray slides with lots of wires, rectangles and other items attached to it.

3. The goal is the interference with the procedures i.e. movement, of something on a level reminiscent of a nuclear, biological or chemical related device. Goal is to eliminate a

(2)

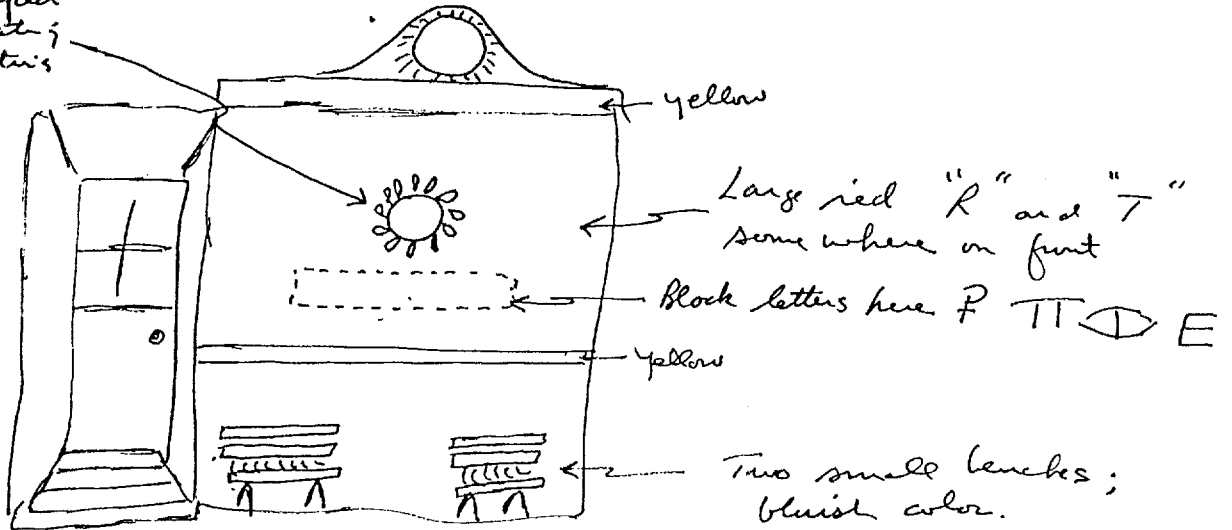

very specific target; not like Pan Am 103 but a specific target in a specific place. It's intent is a manipulation of "the social order"; a ransom threat. Etheral images of multi-rockets, multi-jet engines and launching(s) were also perceived.

VIEWER'S COMMENTS:

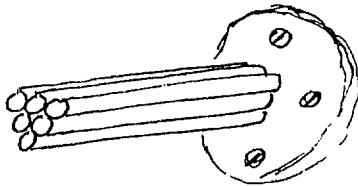

The destination has remained consistent as have the concepts of 1) a very secret meeting where something is delivered/exchanged and the assembling of an object/device.
